

WebDev Sami — Website Launch Checklist

A practical pre-launch checklist for SEO, performance, security, accessibility and conversion.

Done	Checklist item
■	Set a unique title and meta description for every important page
■	Confirm one clear H1 and logical H2/H3 structure
■	Compress and properly size hero/project images
■	Add descriptive alt text to meaningful images
■	Verify mobile layout and tap targets
■	Set canonical URLs, sitemap.xml and robots.txt
■	Add Open Graph image/title/description
■	Connect analytics and conversion events
■	Test contact forms and WhatsApp CTAs
■	Verify HTTPS, security headers and error pages
■	Run a production build before deployment
■	Test redirects and broken internal links
■	Add privacy, terms and cookie information
■	Check keyboard navigation and visible focus states
■	Submit the sitemap to Google Search Console after launch
